

2015 OECD REGULATORY POLICY OUTLOOK

Christiane Arndt
Head of Measuring Regulatory Performance
Public Governance and Territorial Development, OECD
Seminar on Improving the Regulatory Process in Sweden
Stockholm, 19 January 2016

PART I

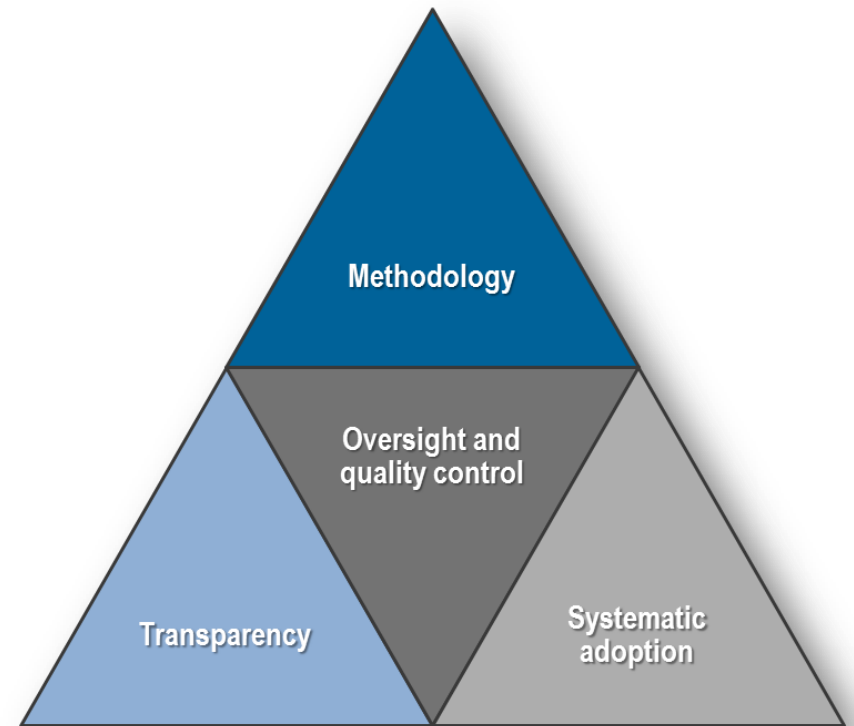

KEY FINDINGS AND RESULTS

From requirements to reality

Methodology to assess regulatory policy tools

- Regulatory Impact Assessment
- Stakeholder engagement
- Ex post evaluation

How good is your RIA system?

2015 Indicators of Regulatory Policy and Governance (iREG): Regulatory Impact Assessment for developing primary laws

Note: The results apply exclusively to processes for developing primary laws initiated by the executive. The vertical axis represents the total aggregate score across the four separate categories of the composite indicators. The maximum score for each category is one, and the maximum aggregate score for the composite indicator is four. This figure excludes the United States where all primary laws are initiated by Congress. In the majority of countries, most primary laws are initiated by the executive, except for Mexico and Korea, where a higher share of primary laws are initiated by parliament/congress (respectively 90.6% and 84%).

How do countries engage with stakeholders?

2015 Indicators of Regulatory Policy and Governance (iREG): Stakeholder engagement in developing primary laws

Note: The results apply exclusively to processes for developing primary laws initiated by the executive. The vertical axis represents the total aggregate score across the four separate categories of the composite indicators. The maximum score for each category is one, and the maximum aggregate score for the composite indicator is four. This figure excludes the United States where all primary laws are initiated by Congress. In the majority of countries, most primary laws are initiated by the executive, except for Mexico and Korea, where a higher share of primary laws are initiated by parliament/congress (respectively 90.6% and 84%).

Ex-post evaluation – unexploited potential?

2015 Indicators of Regulatory Policy and Governance (iREG): Ex post evaluation for primary laws

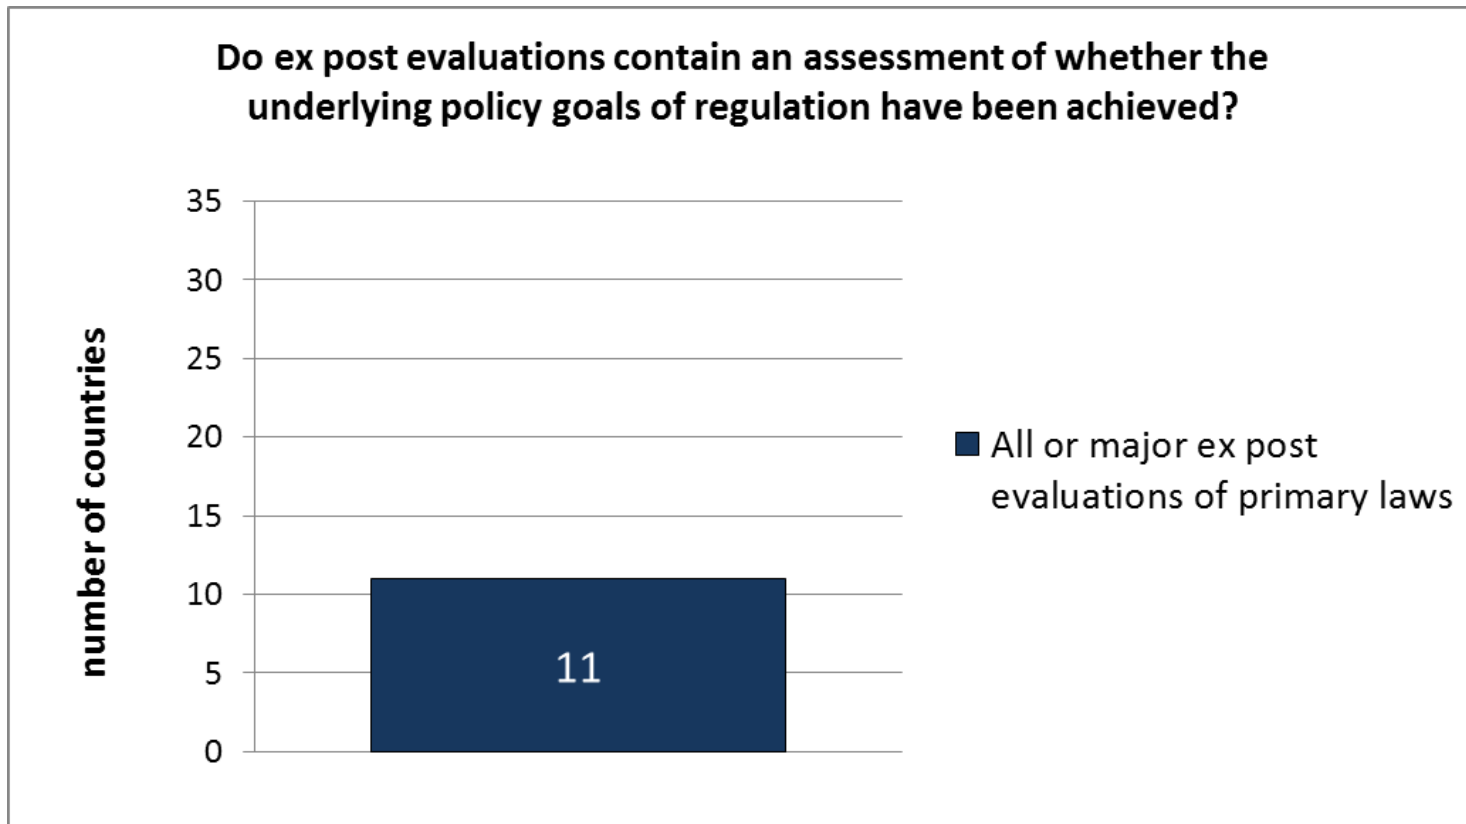

Note: The vertical axis represents the total aggregate score across the four separate categories of the composite indicators. The maximum score for each category is one, and the maximum aggregate score for the composite indicator is four.

Do governments know whether their laws and regulations actually work?

Source: OECD (2015), *OECD Indicators of Regulatory Policy and Governance (iREG)*, <http://www.oecd.org/gov/regulatory-policy/indicators-regulatory-policy-and-governance.htm>.

Why does it matter?

- Enhance productivity through better regulation
- Support inclusive growth
- Improve international regulatory co-operation
- Strengthen the role of parliament and the subnational level in better regulation

PART II

INDICATORS' METHODOLOGY AND RESULTS FOR SWEDEN

Indicators of Regulatory Policy and Governance – Key elements

Regulatory Impact Assessment for developing primary laws

2015 Indicators of Regulatory Policy and Governance (iREG): Regulatory Impact Assessment for developing primary laws

Note: The results apply exclusively to processes for developing primary laws initiated by the executive. The vertical axis represents the total aggregate score across the four separate categories of the composite indicators. The maximum score for each category is one, and the maximum aggregate score for the composite indicator is four. This figure excludes the United States where all primary laws are initiated by Congress. In the majority of countries, most primary laws are initiated by the executive, except for Mexico and Korea, where a higher share of primary laws are initiated by parliament/congress (respectively 90.6% and 84%).

Strengthen RIA oversight

Evaluation should be comprehensive & focus on overall impact of the regulatory framework

Source: OECD (2015), *OECD Indicators of Regulatory Policy and Governance (iREG)*, <http://www.oecd.org/gov/regulatory-policy/indicators-regulatory-policy-and-governance.htm>.

Indicators have their limitations - How to get the full story?

- Country reviews to assess implementation in practice and provide context-specific recommendations
- Surveys of stakeholders and experts
